WHOLE BODY SCREENING ORDER FORM

Patient Name: _____

DOB: _____

Patient Phone: _____

Call the Patient to Schedule: ☐

Complete Screening Options (Check all that apply)

Advanced MRI Packages

State-of-the-art MRI imaging to detect early signs of disease, inflammation, tumors, or other abnormalities — before symptoms appear.

- ☐ **Total VitalScan** (Brain, Spine, Neck, Abdomen, Pelvis) — Comprehensive full-body screening for neurologic, spinal, and organ health
- ☐ **Core Insight Scan** (Brain, Abdomen, Pelvis) — Evaluation of the brain, abdominal, and pelvic organs
- ☐ **Essential Wellness Scan** (Abdomen, Pelvis) — Examination of abdominal and pelvic organs

Lung Cancer/ Heart/ Vascular Screening

LUNG SCREENING: Identifies lung nodules or cancers early when they are most treatable.

- ☐ **CT Low-Dose Lung Screening** (Ages 50–79 with 20 pack-year smoking history) — Proven to reduce lung cancer deaths
- ☐ **CT Chest Without Contrast with Dose Reduction** — Detailed lung and chest exam (for those who do not meet above criteria)

HEART/ VASCULAR: Early detection of heart and stroke risk through imaging of arteries.

- ☐ **CT Coronary Calcium Score (“Heart Scan”)** — Measures plaque buildup in coronary arteries; predicts heart attack risk
- ☐ **Ultrasound Carotid Artery Doppler** — Checks for blockages in neck arteries that increase stroke risk

Advanced Whole Body Composition & Wellness Metrics

- ☐ **Total Body Composition Scan** — Breaks down fat and muscle mass, including android (belly) and gynoid (hip/thigh) distribution—key indicators of metabolic health

WHOLE BODY SCREENING ORDER FORM

Female Screening

BREAST SCREENING: (Recommended annually for women over 40 or earlier with a family history)

- ☐ **3D Screening Mammogram with Profound AI Detection** — Improved cancer detection with advanced AI support and fewer false positives
- ☐ **Screening Breast Ultrasound** — Useful for dense breast tissue; identifies non-calcified lumps
- ☐ **MRI Breast with & without Contrast** — Highest sensitivity for high-risk women; detects hidden tumors

BONE HEALTH

- ☐ **DEXA Scan – Bone Density Screening** — Measures bone loss and fracture risk; detects osteoporosis early so you can treat it

Other Screening Options

- ☐ **Ultrasound Thyroid** — Detects nodules or structural thyroid abnormalities
- ☐ **Ultrasound Scrotum** — Screens for masses, cysts, or other testicular conditions

How to Schedule:

1. **Talk to your provider and get an order for your tests** (they can use this order form or order on our website www.brightlightimaging.com/purevision)
2. **Request an appointment on our website** (www.brightlightimaging.com) **or call us** at 847-616-2000. We offer 6 Chicagoland locations!
